### Symptoms and Labs

**High Risk**
- Ovarian Cancer
- Ascites
- Clear Cell
- Carcinomatosis
- Omental Mass/Caking
- Pleural Effusion
- Papillary Serious
- Fixed or Nodular Mass
- Symptoms concerning for malignancy
- Abdominal/distant metastasis
- Pelvic mass

**Moderate Risk**
- Abdominal Mass
- Adnexal Mass
- Ovarian Mass

**Low Risk**
- Family History of Breast or Ovarian Cancer – refer to Genetic Counseling
- BRCA + mutation
- Lynch Syndrome

### Suggested Previsit Workup

**High Risk**
- Labs: CA 125
- Imaging: Transvaginal Ultrasound (free fluid), CT Scan
- Refer to Gyn Oncology

**Moderate Risk**
- Labs: CA 125
- Imaging: Transvaginal Ultrasound
- Refer to Gyn Oncology

**Low Risk**
- Refer to Gyn Oncology

### Suggested Management

**High Risk**
- Gynecologic Cancer Care referral is encouraged at the discretion of the referring provider.

**Low Risk**
- Gynecologic Cancer Care referral is not necessary for low-risk patients.

---

**Clinical Pearls**

- Gynecologic Cancer Care referral is encouraged at the discretion of the referring provider.

---

These clinical practice guidelines describe generally recommended evidence-based interventions for the evaluation, diagnosis and treatment of specific diseases or conditions. The guidelines are: (i) not considered to be entirely inclusive or exclusive of all methods of reasonable care that can obtain or produce the same results, and are not a statement of the standard of medical care; (ii) based on information available at the time and may not reflect the most current evidenced-based literature available at subsequent times; and (iii) not intended to substitute for the independent professional judgment of the responsible clinician(s). No set of guidelines can address the individual variation among patients or their unique needs, nor the combination of resources available to a particular community, provider or healthcare professional. Deviations from clinical practice guidelines thus may be appropriate based upon the specific patient circumstances.
