## Coulombe Family Tower Construction Update

---

For the week of April 28, the work being done to address water leaks in the Coulombe Family Tower (CFT) will begin to extend to parts of the building adjacent to Wescott Street.

The construction fencing will be extended down Wescott, and a crane will be on-site to assist in the installation of the mobile staging. Traffic flow may be impacted, and flaggers will be on hand to help direct vehicles.

In addition:

- Crews will continue to work on removing brick from the façade of the CFT.
- Affected rooms are in Area A (above main entrance), Floors 2, 3 and 4.
- Noise monitoring devices are in place in the CFT.
- The Main Entrance will remain limited to one lane through the summer.
