

PAYER RESOURCE INFORMATION

Value Based Agreements:

Value-based contracting between MHACO and payors generally encompasses performance-based payment or reimbursement tied to indicators of value, such as patient health outcomes, efficiency and quality. Value-based contracting is designed to improve population health management, where the ACO takes responsibility (and sometimes financial risk) for populations of patients and aims to deliver value for the broader continuum of care across inpatient and outpatient settings. The goal is to reduce overall cost and improve health. For more information, email: ContactMHACO@mainehealth.org

Messenger Model Agreements:

The MaineHealth ACO conveys contract offers to participating providers from the following payers at their request. The ACO does not negotiate reimbursement rates or value-based payments under these “Messenger Model Agreements”. Participating providers may choose to accept the terms of the agreement as presented or reject the terms and negotiate directly with the payer.
